CALVIN D. NEITHAMER, JR., MD

- Davis SD, Neithamer CD, Schreiber TS, Sos TA: False pulmonary artery aneurysm induced by Swan-Ganz catheter: diagnosis and embolotherapy. A false aneurysm that formed after injury by a Swan-Ganz catheter to the pulmonary artery in a patient on long-term anticoagulant therapy is reported. The lesion was demonstrated both by computed tomography and pulmonary angiography. The case is unique in that the patient was successfully treated with percutaneous transcatheter embolization. Mesh-terms: Aneurysm: etiology; Aneurysm: radiography; Aneurysm: therapy; Angiography; Catheterization: adverse effects; Embolization, Therapeutic; Female; Heart Catheterization: instrumentation; Human; Middle Aged; Pulmonary Artery: injuries; Tomography, X-Ray Computed; Radiology. 1987 Sep;164 (3):741-2 3615871 (P,S,G,E,B)
