Meet Our Pediatric Radiologists

Leslie Bord, MD
Joined Fairfax Radiology in 2005

What is a Pediatric Radiologist?

Our board certified Pediatric Radiologists are experts in the diagnosis of illnesses, injuries, and diseases of infants, children, and adolescents. Using imaging techniques and state-of-the-art equipment, they are specially trained to understand the unique needs of children, parents, and pediatricians in the diagnostic process. Our Pediatric Radiologists are an integral part of the diagnostic team that work to provide the absolute best possible care for your children.

John Lee, MD
Joined Fairfax Radiology in 2006

Why does my child need a Pediatric Radiologist?

Our Pediatric Radiologists are specialists in the best imaging techniques to diagnose medical and surgical conditions. Because children can have unique illnesses and concerns, the Pediatric Radiologist must fully understand childhood disorders and the special needs of children. They use a wide spectrum of diagnostic studies, including x-ray, ultrasound, computed tomography (CT) and magnetic resonance imaging (MRI). They ensure that testing is performed properly, safely and gently, and they interpret the results of the tests to make an appropriate diagnosis. All of our Pediatric Radiologists work with you to ensure your child's care is delivered in a way that is both comfortable and comforting.

Ian Mills, MD
Joined Fairfax Radiology in 2018

Providing imaging expertise throughout Northern Virginia since 1965.
